

## An AI analysis of EnVision users' personal vision statements

# Community Pain Points

## People in Need

- Lost in fragmented services
- No incentives
- Losing hope

## Service Providers

- Little collaboration
- No way to track clients
- Traditional funding sources are drying up

## Community/ Government

- Hundreds of unintegrated programs
- People continuously falling back into expensive services
- High costs
- Low/No transparency

# The **enVISION** Social Network

# Brings Everyone Together

# AI Analysis of Personal Vision Statements Entered in EnVision

## EnVision's AI analysis indicates...

The dominant aspiration among users is **stability**:

- Safe, permanent housing
- Reliable income or employment
- Financial control (credit repair, saving, paying bills)
- Predictable routines and reduced chaos

EnVision's AI analysis indicates...

EnVision is perceived as a **family-level intervention**, not just an individual tool

Users see EnVision as a platform for **self-respect, pride, and identify**—not just crisis relief

Users have a **strong desire for growth**, not just assistance

EnVision's AI analysis of user statements indicates the system is...

Seen as a **guide, organizer, and mirror**

Not just a resource hub—it's being experienced as  
a **values-based community**

A **narrative-reset platform**, not just a service directory

EnVision's AI analysis indicates...

Users see EnVision as a ***ladder***, not a safety net

# We're Making Lives Better!

- A sustainable solution to transform an inefficient system
- Thousands lifted toward self-sufficiency
- More effective government
- Stronger communities...from the bottom up
